

Top 10 Homeowner Safety Check List

Do It Yourself!

Look for these hazardous conditions in your home or office, garage, basement or attic. Sometimes a simple visual inspection can reveal a lot.

If you find any of these hazards you should call a qualified electrician to make repairs.

- Frequently blown fuses or circuits
- Lights that flicker or dim
- Exposed wiring or electrical boxes
- No GFCI outlets next to sinks and tubs
- Broken switches or outlets
- Bulbs mismatched to fixtures
- Uncovered outdoor receptacles
- 3-prong adapters in 2-prong outlets
- Frayed appliance or lamp cords
- Overloaded outlets
